Grupa Azoty Signs a Multi-Year Fertiliser Supply Contract for the Scandinavian Market

At the end of 2025, Grupa Azoty entered into a multi-year contract for the supply of NPK and NP compound fertilisers to the Scandinavian market with an experienced trading partner – Thoroe Nielsen A/S. The agreement represents an important element in the implementation of Grupa Azoty's export sales development strategy and the continued strengthening of its presence in Northern Europe.

The Scandinavian market remains one of the key export destinations for nitrogen and compound fertilisers. Systematic growth in demand in this region is translating into increasing sales volumes, while the Group's product offering meets stringent quality standards and the expectations of end customers.

'The signed contract strengthens our position in one of the most demanding markets in Europe. Long-term cooperation with an experienced trading partner provides sales stability, enables better volume planning, and confirms the competitiveness of Grupa Azoty's fertilisers in terms of quality and performance parameters,' **emphasizes Andrzej Dawidowski, the Vice-President of the Grupa Azoty Management Board and the President of the Board of Grupa Azoty Police.**

The conclusion of the agreement forms part of coordinated actions across the entire Group, aimed at diversifying sales destinations and developing long-term relationships with trading partners in foreign markets. Across Grupa Azoty as a whole, significant fertiliser sales volumes have been achieved in the current period, confirming the effectiveness of the adopted commercial strategy and the strong position of the Group's product portfolio.

The contract with Thoroe Nielsen A/S ensures the continuation of stable supplies of NPK and NP fertilisers to the Scandinavian market and constitutes an important element in the further development of the Group's export activities.
